DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings are informal and not clear. Specifically, structures in Figures 2, 3a, 3b and 4 (ref.#s 204, 310, 312, and 408) have varying shading, which renders the drawings unclear as the specific structure illustrated. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-32 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art (Novak US 6,653,639) teaches that a temperature difference between a reticle (mask) and a chuck (platform) may cause the reticle and chuck to expand at different rates that may result in a slip from the holding position (i.e., facilitate separation of the mask and platform). However, Novak is directed to preventing a temperature differential and to maintaining the contact between the mask and the platform. Thus, the prior art does not teach or disclose providing a temperature differential between a mask and a platform to facilitate separation of the mask and the platform.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Novak (US 6,653,639) discloses a method and an apparatus for enabling reticles to be stably held in a lithography system. Watkin (US 4,202,623) discloses a temperature control system to maintain the temperature differential between a mask and a wafer.

5. This application is in condition for allowance except for the following formal matters:

Objections to Drawings (noted above).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
